

For Immediate Release

Thermacore Maintains Commitment to Quality with AS9100 Certification

Lancaster, PA, April 7, 2009 – Thermacore, Inc. announced today that the company has received AS9100:2004 Rev B certification and was re-certified to ISO 9001:2000. “Thermacore’s commitment is to provide high performance thermal management solutions which meet or exceed our customer’s requirements. AS9100 certification demonstrates this commitment throughout the entire organization,” said Jerome E. Toth, President and Chief Executive Officer of Thermacore, Inc.

The AS9100 standard was established by the International Aerospace Quality Group (IAQG) for the purpose of achieving significant industry improvements in quality and safety, and reductions in cost throughout the value stream. AS9100 is recognized globally and incorporates best practices from across the aerospace industry.

The registration was granted by Lloyd’s Registrar Quality Assurance (LRQA), an ANAB Accredited Recognized organization. Dallas Fisher, Quality Manager at Thermacore, Inc. explained, “We chose LRQA as our registration partner because they provide high quality assessment and registration services, their clients include major names in the Aerospace business, and they have helped us stay focused on improving our quality systems and increasing the value obtained from them.”

About Thermacore, Inc.

Founded in 1970, Thermacore specializes in the custom design, development, and manufacturing of highly engineered thermal management systems and components for a variety of OEM applications across a diversified set of global markets that includes Military/Aerospace, Computer, Communication, Energy Conversion, Medical, Transportation, Test Equipment, and Automotive. With over 39 years of experience in the design, development, and manufacturing of passive two-phase systems, Thermacore brings unparalleled engineering design expertise and thermal solution performance, quality, and reliability to these markets. Thermacore employs more than 175 employees at 2 facilities located in the United States (Lancaster, Pennsylvania) and the United Kingdom (Ashington, Northumberland). Both facilities are ISO 9001 and ISO 14001 certified, with AS 9100 certification in the Lancaster facility. For information about Thermacore, visit www.thermacore.com.
